Industrial growth in Tamil Nadu

4387. SHRI K. THULASIAH VANDAYAR: Will the PRIME MINISTER be pleased to state:

(a) whether the industrial growth is very slow in Tamil Nadu;

(b) if so, the reasons therefor: and

(c) the resources made available to the State Government by the industrial growth?

THE MINISTER OF STATE IN THE MINISTRY OF INDUSTRY (PROF. P.J. KURIEN): (a) and (b). The Central statistical Organisation (CSO) does not compile State -wise monthly index of industrial production. Ministry of Industry also does not maintain state wise information on industrial production. According to the overall Index of Industrial Production from CSO,the overall rate of growth of industrial production during April-August, 1991 was (-) I.O. percent as against 12.4 percent during April-August, 1990.

This decline was due to several factors. In some sectors, this was due to a shortage of raw materials, particularly imported raw materials, because of foreign exchange constraints. In some other sectors, the fall in growth rates may be attributed to the plateauing of demand after extremely high growth rates in previous years. The imposition of some specific import restrictions due to balance of payments considerations contributed to a slow down in the growth in some sectors. Some other sectors were affected by infrastructural constraints such as power and coal shortages in some areas and industrial relations problems in some sectors.

(c) According to the annual Plan 1990-91 from planning Commission, the allocation for 'Industry & Minerals' to the /States of Tamil Nadu was Rs. 4984 crores in 1990-91 against Rs 4506 crores in 1989-90.
